Professor Bankole Johnson, an award-winning neuroscientist and founder of the Company developed the Kolé dietary supplement range based on his extensive understanding of the brain chemistry. He has formulated four Kolé functional tonics that can enhance mental agility (**INSPIRE**), induce a sense of bliss and tranquility (**HAPPY**), enhance sexual intimacy and performance (**IGNITE**), and promote sleep (**DREAMS**).

This proprietary blend of amino acids, vitamins, minerals, and herbal adaptogens have been formulated and refined over the last few years to deliver effective, health-promoting beverages, with potent and lasting effects to enhance certain targeted aspects of brain function.

These proprietary blends contain a complex mixture of multiple nutraceuticals at **the right relative concentration and amount** to enter the brain and enhance certain desired functional states.

The delicious citrus flavor of Kolé Inspire enhances alertness, focus, memory, brain performance, energy and nutrient replenishments to prevent hangovers. Thiamine is essential for the nervous system and can be reduced by excessive alcohol intake. It helps in the prevention of hangovers. Riboflavin an essential nutrient required for numerous cellular processes including the balance of monoamines in the brain. Niacin increases blood flow to the brain and helps to reduce apathy and sense of boredom. Vitamin B-12 & B-6 can help reduce drowsiness and promote mental alertness, along creating hemoglobin which carries oxygen to the brain, decreasing irritability and depression. Biotin a metabolic transmitter known to have detoxifying effect and can help combat lethargy. Magnesium used to calm the nervous system.

Inspire is enhanced with Cognizin! Click below to learn more.

Enhanced with
Cognizin®

Ignite promotes and extends libido and sexual excitement and performance with its mixed berry taste. Scientifically formulated to increase stamina, blood flow and staying power. Vitamin E known as important antioxidants that protect the brain and other organs from damage. It helps support sex drive and boosts libido. Chromium an essential trace element helps with blood sugar control, depression and increases libido. L-Arginine is an amino acid that quickens the repair time of damaged tissue. Ginseng Root Extract promotes nitric oxide and thereby nitrenergic transmission to increase sexual function. Oat Straw Extract helps boost energy by bringing more oxygen to the brain and helps boost libido and sexual excitement. Epimedium Grass Extract inhibits the activity of PDE-5, and has reported aphrodisiac effects. N-Acetyl-L-Tyrosine increases drive and enhances energy. Yohimbine Hydrochloride enhances vasodilation in men and engorgement in women.

Our Happy blend enhances mood, tranquility, bliss and a sense of well-being. The great taste of Blue Raspberry flavor helps to stimulate mood. Niacin helps to increase increases blood flow to the brain and helps to reduce apathy and sense of boredom. Vitamin B-12 helps promote healthy brain cells and can decrease irritability and depression. L-Tryptophan is a precursor of the essential brain chemical serotonin which helps to induce sleep and promotes a positive mood. Glycine helps reduce anxiety and can give the blissful feeling that some report after taking alcohol. L-Glutamine is an amino acid found within the actual code of DNA, it is useful to help the body increase its endurance and promote muscle growth.

Dreams, our tropical blend is formulated to promote quality restful sleep and pleasant dreams in everyone. Dreams can also be taken to prevent jet lag when used at the beginning of a long flight, as well as a sleep aid for shift workers. Vitamin B-12 helps to maintain healthy nerve and red blood cells and may protect against brain shrinkage and promotes balanced immune functions. Magnesium is used to calm the nervous system. Melatonin is known to have a detoxifying effect, with right quantity helps to promote sleep.
